W.I. Flower Show Friday, Aug. 22

The annual flower show under the auspices of the W.I. will be held on Friday, Aug. 22. It is anticipated this event will be particularly interesting this year as material for exhibits is in evidence in almost every garden.

The committee in charge of the W.I. flower show would like to have the exhibits sent to the Community Hall on the afternoon of August 21st or early on the morning of the 22nd, as the judging will take place in the forenoon of the latter date. There are no restrictions as to exhibitors.

THE PRIZE LIST

Sweet Peas, colors, 6 of each	50	25
Best Collection of Sweet Peas, 6 of each variety	75	25
Godolias	50	
Asters, 1 color	50	
Asters assorted, not less than 12	50	25
Dahlias, 1 color	50	
Dahlias, 6	50	25
Marigolds, 6	25	
Cosmos, 12	75	50
Pansies, collection of 12	50	25
Snap Dragons, 6 spikes	25	25
California Poppies	50	25
Phlox, collection	50	25
Nasturtiums, table bouquet	50	
Best House Plants of 4, any variety in bloom	1.00	
Chrys. 1 spike, any color	25	
Best collection of scented flowers	50	
Best collection for table bouquet	75	
Sunflower	50	
Perennials, special prize	1.00	

School Meeting

2 P.M. Saturday

By an error a meeting of the ratepayers of Champion Consolidated School District was advertised for Saturday, Aug. 9th. This date should have been Saturday, August 16th, and the correction appears elsewhere in this issue. As a trustee will be selected at this meeting it is to be hoped a quorum of ratepayers, at least, will turn out for the occasion.

Has Located Here Permanently

Dr. H. Newton Heal, who has previously divided his time between Champion and Milk River, is now permanently located in Champion and will devote his whole time to his dental practice here. Residents in this vicinity will appreciate the change.

Most of the holidayers are home again from their trips to the various summer resorts and "business as usual" is again the order of things.

Community Exhibit Well Handled

Booth Decorations and Display of Produce Greatly Admired

The victory of the Champion community exhibit at the Carmanagay fair was a decidedly noted one. Both Carmanagay and Barons, the other competitors, made a determined effort to win and their exhibits were of a character to command respect anywhere. The display of the Champion exhibit was undoubtedly the deciding factor in the case and for this the endeavor of the committee, Mrs. Orville Harper, deserves the highest praise.

An elevator, some three feet in height, was the center of the background of the booth, this being entirely covered with wheat kernels. Immediately in front of this was a miniature farm, including buildings and a field of wheat. The disposition of the shelving and the distribution of the exhibits in the booth also showed artistic care throughout. Sweet peas and baby's breath were used as decorations with a profuseness that could not fail to attract attention, while white and purple streamers added to the beauty of the decorative scheme.

153 individual articles were in the exhibit and these were of splendid quality throughout, and it is doubtful if the collection could be any more than equalled in any part of the three prairie provinces. In this respect all three districts deserve every distinction possible—the exhibits were excellent. In winning under such circumstances Champion has every reason to feel very proud, both of the products furnished and of the way in which they were handled by those in charge.

Thanks are due first to the exhibits which were tendered freely, everyone seeming inclined to help to the greatest extent possible. While individual mention of the contributors is scarcely possible, those who collected the exhibits extol the kindness with which they were invariably met. The W.I. committee, viz: Mrs. O. Harper, convenor; Mrs. Beaulieu and Mrs. Millin, left no stone unturned to make the very best showing possible, while the rank and file of Institute members, particularly Mrs. W. A. Summers at whose home the exhibits were collected and prepared, were ready at all times to render every assistance.

Naturally the result will repay everyone concerned for the efforts put forth in making up this exhibit when the community feature is considered, as such a creditable undertaking, carried out so successfully, could not fail to impress every public spirited resident of the district.

Band Concert Sunday Night

Valeau band will give a concert in the community hall on Sunday evening, Aug. 17, commencing at 8 o'clock. Residents of Champion and vicinity will welcome this opportunity to hear what is unquestionably one of the best bands in Alberta. In addition some excellent vocal numbers will be rendered. Don't miss this.

Miss Ella Stephenson returned to Calgary on Saturday after having spent two weeks at her home.

THURSDAY, Aug. 14, 1930

NOTES AND COMMENT.

Warm, dry weather has continued throughout the week, hot nights accompanying the hot days in many instances, an unusual occurrence here. Harvest is progressing rapidly, binders being in operation in every direction, and combines will be in general use in a few days. Straight combining will be the popular method of handling the wheat crop this year and present weather conditions if continued will be very favorable for avoiding swathing of wheat. Men have been plentiful at all times, although most of those staying here have found employment. Many of those seeking work, however, move so rapidly their best opportunities are lost.

There will be a school meeting on Saturday. As a rule some five or six ratepayers attend these meetings, a very discouraging situation to members of the board who have given of their time freely to the handling of the business of the school district, and knowing its importance to everyone concerned, think more general public interest should be shown. The meeting in this instance is for the purpose of electing a trustee to fill a vacancy caused by the resignation of a member of the board and it is to be hoped more than the usual interest will be developed.

It is not very long ago that "book farmers" were quite commonly ridiculed. Nowadays public sentiment in this direction has changed and such statements as are contained in the accompanying article, "The Pale Western Cutworm," are treated with the respect to which they are entitled. While rain would be necessary to permit the directions given for protecting the fields from the egg-laying moths being carried out, as many have worked their land since moisture would have permitted the formation of a crust on the surface, the knowledge that this would save the situation may easily be stored until conditions are favorable to its application.

The first prize which the Champion community exhibit won at the Carmangay fair in competition with Carmangay and Barons may well be regarded with considerable pride by all residents here. Those who were able to visit the fair and view the display were enthusiastic in their praise of the community contest and the splendid exhibits from all three districts. Champion won largely on the excellent preparation and display of the exhibit, for which the W.L. committee was responsible.

While the flight of Zeppelins or dirigible airships is exciting it is hard to see just how the expenditure of huge sums of money on this type of vessel is justified. The aeroplane is being improved so rapidly that it seems bound to replace these clumsy, lighter than air ships in the very near future.

The Pale Western Cutworm

BY
MAJOR H. G. L. STRANGE
Director Agricultural Research Department
Searle Grain Company, Ltd.

The Dominion Entomologists of Lethbridge and Saskatchewan, Mr. H. L. Seamans and Mr. K. M. King, have issued a very grave warning to all farmers in Alberta and Saskatchewan regarding the great damage to crops that may occur next year because of the cutworm.

The dry May and June that has been experienced in most parts of Alberta and Saskatchewan this year has tended enormously to increase this insect pest, and it is expected that unless May and June of 1931 are much wetter than is usually the case, that the greatest and most widespread damage that has ever been experienced will result from cutworms.

Most of Saskatchewan south of Saskatoon, it is expected, will be badly affected, with the worst damage within a hundred mile radius of Regina. In Alberta the damage will probably be very general east of a line from Edmonton to Medicine Hat and as far south as the Lethbridge-Medicine Hat line of the Canadian Pacific Railway.

The damage to the 1931 crop will depend absolutely upon the way the fields are handled this present August and September.

The moth of the cutworm flies across the fields and lays its eggs, starting in the first few days of August, reaching its maximum flight about the 20th, and continuing to fly and lay eggs until about the middle of September.

This moth will avoid all land that has even a very slight crust formed on it by rainfall, but will lay its eggs upon any soil where this crust has been broken, however slightly.

To avoid cutworm damage on a field, therefore, it is necessary on summer-fallowed fields all work should stop by the first of August or a very few days afterwards. Then a very slight rain will form a crust on these fields which will render them immune the following year from cutworm damage.

It is most important that no horses or stock or implements or wagons shall be allowed to cross any summerfallow prepared in this fashion, because wherever the crust is broken by animals or implements there the moth will lay its eggs, and a great deal of damage will be experienced the following year.

On fields in crop, where harvesting operations are before about September 1, then damage the following year is almost certain to be experienced unless the fields are summerfallowed.

It is apparent, therefore, that all fields which are cropped this year, as far as possible, should be summerfallowed in the year 1931, and that in addition all work on summerfallowed fields this year should cease as soon after August 1 as possible, and that nothing should be allowed to walk over or cross these fields.

Mr. H. L. Seamans, Dominion Entomologist at the Lethbridge Laboratory, without hesitation states that it is far better to allow weeds to grow on the summerfallow after August 1 in these affected areas rather than to disturb the crust of the soil and so invite cutworm damage.

SAFETY at ANY speed

With the new Firestone Heavy Duty Gum-Dipped Balloon Tires you have a wide margin of safety at ANY speed. Built in advance of today's car requirements, they withstand rougher usage than any car on any road at any speed, can give them.

Firestone Heavy Duty Balloons are made of Gum-Dipped cord construction—the strongest and safest method known. They have a deeper safety tread, extra side-wall thickness and two extra plies of Gum-Dipped cords just beneath the tread to absorb road shocks. They are the strongest, safest, toughest tires that Firestone has ever built.

Make your car safer for travel. Equip it with a set of new Firestone Heavy Duty Balloons. See your nearest Firestone Dealer today.

Western Homesteads Can Be Beautified by Planting Flowering Shrubs About House and Yard

For too many homesteads lack the finished effect that may be obtained by planting a few flowering shrubs about the house and yard. The shrubs there is nothing to fill the angles formed by paths or fences, or to screen unsightly objects; nothing to soften the abrupt angles formed by the corners of the building or where the foundation meets the ground; nothing to take away the bare appearance of the home and to give it an air of permanency and comfort.

The majority of people appreciate the beauty of shrubbery, and realize how much improvement can be brought about by its use, but for various reasons many fail to do any planting. The chief reasons for this neglect are probably the lack of knowledge as to what to plant. If all the planting material in the market one time, the cost is in many cases prohibitive, and, if the work is to be done well, the labor involved will be considerable. For this reason, it is never wise to attempt to do a great deal in any one year. A little planting done each year will soon easily bring surprising results in a short time. The cost of many beautiful flowering shrubs is small, and everyone can afford to buy at least one or two each year. Some cannot be propagated easily by the amateur and therefore have to be purchased from a nurseryman. Others are very easily propagated, and when one specimen has been bought, it can easily be increased to supply all of that species that will be required.

Many rules for the arrangement of planting material have been given by experts from time to time. These frequently involve a large outlay and considerable study, but, while they may lead to wonderful results, they also have the effect of discouraging people who are able to do a small amount of planting. This should not deter anyone from making a start. The greatest amount of pleasure will be found in arranging the shrubs to suit one's individual taste. If, after a time one sees where an improvement could be made, the shrub may be transplanted and rearranged.

There are a few simple rules which may help one to avoid common mistakes. Do not plant the shrubs too close to the foundation of the house, but picture them as they may be ten or twelve years after planting and allow them plenty of room for development. A symmetrical shape, if the shrub is poor and consists chiefly of last year's growth, may be pulled out and a hole about three feet in diameter and about twenty inches deep, fill it with good earth from the garden or yard, work in some well-rotted manure as the clay is filled in, and pack the clay firmly with the foot. Then plant the shrub in the centre being careful not to have manure coming in direct contact with the roots. To invigorate the surface occasionally for at least for the first two or three years, or till the shrub is fairly established, and has made considerable growth. When planting shrubs in a shady position, be careful to choose species that do well in the shade. Whenever possible visit the nearest Experimental Station during the growing season. This will assist in making a choice of varieties. Send for the nurseryman's catalogues and study them. They contain many valuable suggestions.

Sheriff Is Appointed
Louis H. Howe is the new sheriff of Manitoba's eastern judicial district. Former deputy secretary for the province, his appointment to succeed the late Col. Rupert Inkster was announced recently.

Scientists have now produced an artificial rain from water and carbon dioxide gas.

Canadian Sugar Industry

Wages Paid By Eight Sugar Refineries Total \$2,748,396

The total amount of wages paid by the eight sugar refineries of Canada last year was \$2,748,396, a slight increase over 1928, according to a return issued by the Dominion Bureau of Statistics. Capital invested amounted to \$45,034,115, a decrease from \$48,028,919 in 1928.

The Canadian refineries employ 2,325 persons, of whom 2,018 draw wages and 307 are salaried.

The value of the products amounted in 1929 to \$47,151,960, which was a decrease from \$52,035,155 in 1928. (In 1928 the gross value of the sugar products of the eight refineries was \$58,445,878.)

Last year \$2,556 acres were grown to sugar beets, with a yield of 7.25 tons per acre and a total yield of 253,485 tons. The average price per ton was \$8.84, giving the total value of \$2,280,996.

Food Preservative

Scientists Isolate Natural Agent In Milk Which Prevents Growth Of Micro-Organisms

A successful, non-poisonous food preservative may be obtained from cow's milk, as a result of recent investigations reported by Dr. P. S. Jones and H. S. Simms of the Rockefeller Institute for Medical Research. These scientists were able to isolate the natural agent in milk which prevents the growth of micro-organisms. It is found in the whey after the routine separation of the butter-fat and casein. It can be obtained in pure form in a powder which keeps for several months. One grain of the powder added to a gallon of the ordinary medium on which germs grow will prevent their growth, it is reported.

Winipeg Newspaper Union

(By Anabelle Worthington).

There is increased quantity production in the aggregate of metals and minerals, but owing to low metal prices, the gross value dropped from \$122,722 in the first half of 1929 to the estimated \$29,509,487 for the first half of 1930, a decline of more than 12 per cent. Among the unfavorable features are included the rather unattractive outlook for any material movement in silver and zinc prices for some time to come, which may cause certain hitherto productive mines in British Columbia to remain idle. The output of gold production also fell away 18 per cent.

Trade With Japan

Howard Marler, son of the Canadian Minister to Japan, made a statement, while passing through Winnipeg recently, to the effect that there is a splendid opening for Canadian manufacturers in Japan. Although trade is rapidly developing, he pointed out, there is still a great need for manufacturers to appoint representatives in the Far East.

Girls are now forbidden to powder their noses in Rumania. They will be a shining example to the rest of the world.

On the terrace of the Banff Springs Hotel recently the above-named ballad opera was presented by the third Imperial Light Opera Company, at the hotel. Topsy, log fire, cordwood seats and even a portable organ were among the props and hundreds of guests were shown what an evening camp sing-song is like. The Opera Company was assisted by Trail Riders of the Canadian Rockies seen clustered around the fire. The scene will live long in the memories of those who witnessed it.

Problems For The Farmer

Low Wheat Prices Create a Difficult Situation For The Grain Grower

With another wheat crop coming along and a large surplus still on hand from the previous year, the situation is far from cheerful. Every body in an agricultural country such as Canada has a stake in the state of the farming industry, yet it will be conceded that the problem rests more heavily on the shoulders of the actual producer than on anyone else. Difficulty is met in predicting the probable curve of wheat prices for the reason that a year of small yields over any large section of the world's wheat growing areas would be almost certain to lead to an advance in price that would make wheat growing look like a remunerative business to the producers who happened to have wheat for sale. At the same time there is a fairly widespread opinion that wheat prices are likely to remain at a lower level than has been the case during the last seven or eight years. This would indicate that the world's surplus of wheat is so large that the surplus are responsible for the sharp break in prices.

Will it benefit Canadian farmers to grow less wheat under the circumstances? If the wheat acreage is reduced, what is to take its place? Is there any guarantee that the other wheat growing countries in the world will reduce their acreage? Can the lands of Western Canada be turned to some other form of farming that will be profitable? Can a change in farm methods make it possible for the Western Canadian farmer to grow wheat at a profit even when the price is low?

In the last analysis it appears to be the job of the farmer to suggest some light on the problem that he is the victim of exploitation this should be made known. If his methods are wrong they should be possible for correction. We have many successful farmers in Western Canada who should be able to show some light on the problem that confronts the country's basic industry.—Regina Leader-Post.

Mining In British Columbia

Increases Quantity Production In The Aggregate Of Metals

Despite worldwide depression in the mining industry, following the drop in metal prices, mining in British Columbia during the first half of the year has shown considerable progress, according to the semi-annual summary of the British Columbia Department of Mines.

There is increased quantity production in the aggregate of metals and minerals, but owing to low metal prices, the gross value dropped from \$122,722 in the first half of 1929 to the estimated \$29,509,487 for the first half of 1930, a decline of more than 12 per cent. Among the unfavorable features are included the rather unattractive outlook for any material movement in silver and zinc prices for some time to come, which may cause certain hitherto productive mines in British Columbia to remain idle. The output of gold production also fell away 18 per cent.

Watering The Garden

The Use Of Watering Can Largely Wasted, Experts Say

The use of the watering can in the garden is largely a waste of effort, declares W. D. Albright, superintendent of the experimental station at the Dominion Department of Agriculture, at Beaveridge, Alberta. If the amount of water is conserved, it will result in more soil moisture being conserved for the growing plants than it is possible to give them through the use of the watering can, he states. It requires at least one half-inch of rainfall to moisten a dry soil deep enough to reach many of the feeding roots on the average plant. And even with such a rainfall, much of the moisture is lost through evaporation before the plant roots are reached. The average application from a watering can is much less in volume and under many conditions it is much more subject to rapid evaporation than a rainfall.

Watering The Garden

The Use Of Watering Can Largely Wasted, Experts Say

The use of the watering can in the garden is largely a waste of effort, declares W. D. Albright, superintendent of the experimental station at the Dominion Department of Agriculture, at Beaveridge, Alberta. If the amount of water is conserved, it will result in more soil moisture being conserved for the growing plants than it is possible to give them through the use of the watering can, he states. It requires at least one half-inch of rainfall to moisten a dry soil deep enough to reach many of the feeding roots on the average plant. And even with such a rainfall, much of the moisture is lost through evaporation before the plant roots are reached. The average application from a watering can is much less in volume and under many conditions it is much more subject to rapid evaporation than a rainfall.

Half an inch of rainfall provides moisture equivalent to a pailful of water for every square yard of garden; 30 pailfuls to a square rod, or 2,400 pailfuls for a garden eight rods by ten rods. From this it will be apparent that watering the garden adequately once a week becomes a man-sized job.

Weeds are the greatest menace to garden crops, particularly because of the extent to which they rob the soil of moisture. If the weeds are pulled by the same amount of time spent by the average gardener in the use of the watering can was expended in applying the hoe to keep weeds under control it would insure the conservation of more moisture to the plants than can be provided in the same length of time through the use of the watering can.

The most effective way of watering the garden is to dig a trench with a hoe near the plants to punch holes and pour water into these. This brings the water more directly in contact with the feeding roots and prevents evaporation. Not only is the moisture lost less, but the watering can but it frequently impairs the physical condition of the soil by puddling the surface.

Wealth From Forests

Canada Is The Chief Source Of The World's Paper Supply

The forests of Canada continue to be the chief source of the world's paper supply. During the past year Canadian paper has been exported to 33 countries, ranging through the United Kingdom, Australia to Uruguay. Without the forests and paper mills of Canada the business of supplying the world's news to the public would be seriously restricted. Canada is becoming as famous for her paper as for her wheat.

Paper and wheat are more closely related than appears on the surface. Much of Canada's forested area is potentially good farming country, and as the forests are removed for the manufacture of paper the land is cleared for the plough and is added to agricultural production. Forests, in such cases, are a source of income to the new settler, who receives cash for his pulpwood while clearing it off his land.

While Canada's principal export of paper is in the printing process, it is an interesting variety of other paper products. Wrapping paper, writing paper, and wall paper are exported to many countries, and in June more than a million pounds of paper were exported to the United Kingdom alone.

Alberta Resources

Natural Resources To Be Handed Over To Province On October 1

Alberta's natural resources will be formally handed over to the province on the first day of October. It was announced by the Provincial Government. An agreement providing for the formal transfer of the resources has been reached between the provincial and Federal Governments, and has been signed in their behalf by Premier Brownlee and Charles Stewart, respectively. The effect of the agreement is merely to transfer the resources to the province, but the transfer of the resources to the province is not a condition to other terms of settlement.

Alpine Extension Course

New York University has announced an aeroplane extension course which will be inaugurated this fall. The project calls for the participation by air of professors of the university at intervals to a number of towns in New York and neighboring states where instructions in aviation will be given in grade schools, high schools and others.

More Workers Employed

In a report issued recently, the Dominion Bureau of Statistics, in analyzing the employment situation in Canada, said there were 21,296 more persons earning wages in Canada on July 1, last, than on June 1, 1929. The increase was due to the fact that more persons were employed in Canada.

Surplus Of Wheat Is A World Condition And Not Restricted To Canada Alone

Successful Field Day

Manitoba Wheat Pool Sponsors Gathering At Brandon Experiment

About 300 people from thirty-three points adjacent were represented at the successful field day arranged by the Manitoba wheat pool and held at the Experimental Farm at Brandon, S. D. Watson, local field man for the wheat pool, had charge of the arrangements.

The horticultural work being done at the farm under the direction of J. H. Cooper, was viewed by the visitors. Guided by S. J. Sigfusson, they then inspected the cereal plots where Mr. Sigfusson drew attention to the treatment of summerfallow, comparing plowing summerfallow with the use of the cultivator only. They also visited the cereal breeding plots.

The advantage of plowing under sweet clover as a means of soil enrichment instead of plowing under grasses was evident when the party accompanied Dr. Buckley to view plots where crops were flourishing where land had been so treated. Prof. Harrison explained how to select the best seed plot for registered seed or exhibition work. Adjustment was made to the tent where these problems were discussed further.

Wealth From Forests

Canada Is The Chief Source Of The World's Paper Supply

The forests of Canada continue to be the chief source of the world's paper supply. During the past year Canadian paper has been exported to 33 countries, ranging through the United Kingdom, Australia to Uruguay. Without the forests and paper mills of Canada the business of supplying the world's news to the public would be seriously restricted. Canada is becoming as famous for her paper as for her wheat.

Paper and wheat are more closely related than appears on the surface. Much of Canada's forested area is potentially good farming country, and as the forests are removed for the manufacture of paper the land is cleared for the plough and is added to agricultural production. Forests, in such cases, are a source of income to the new settler, who receives cash for his pulpwood while clearing it off his land.

While Canada's principal export of paper is in the printing process, it is an interesting variety of other paper products. Wrapping paper, writing paper, and wall paper are exported to many countries, and in June more than a million pounds of paper were exported to the United Kingdom alone.

A Man In Love

A man in love loves: a woman in love forgives.

Many People These days are disposed to criticize the Canadian Wheat Pool for the large quantity of wheat that is carried over in this country into the next crop year, says the Monetary Times. Fair-minded people, however, will temper their criticisms somewhat when they become conversant with the fact that the surplus of wheat is a world condition and not restricted to Canada alone. Some weeks ago attention was directed in these columns to the fact that in the United States the situation was recognized as so important that the Department of Agriculture at Washington, got out a survey of the world situation, and suggested that a reduction of acreage by the American wheat farmer in conjunction with similar action by the rest of the world would be the desirable course. The fact that the United States Government takes such action is a strong indication of the upsurge which was caused by the British policy of rubber plant restriction a year or so ago.

In the years since the war the acreage sown to wheat has shown a tendency to increase over the world and with surplus increasing at a rate faster than the consumption it was inevitable that a surplus should be created. Now this is to be absorbed in the next few years, short of a total crop failure, constitutes a problem of world dimensions.

The Orient is generally indicated as the most likely part of the world to increase its consumption of wheat. The rice-eating people of the East are gradually becoming wheat consumers to a greater extent. This has been due, no doubt, to a variety of reasons, one of which may doubtless be traced to the large numbers of Chinese laborers employed during the great war in France. Many who saw service in France will remember the Chinese laborers eating rice during their midday meal by the roadside, holding what looked like big dumplings. During the past months the Chinese laborers have been in the East. Moreover, as has been noted previously, experiments with school children in Japan and the Philippines have demonstrated the advantage of adding wheat to the diet.

However, in the meantime, new areas of the Canadian West have been opened up from year to year and more land brought under the plow than in any other country. Australia have also tended in the same direction and supply has increased. The fact that wheat is so plentiful may be found with the Pool for the method of trading, they are not altogether content with the fact that Canada will have a large wheat surplus.

Central Heating Plan

Central Heating Plants In Winnipeg Are Being Extended

In Winnipeg, "central heating" does not mean a furnace in the basement of each house—it means a large central plant in which the heat is piped to many blocks of business buildings and residences. This principle of heating is not a new thing in Winnipeg, for it was first established in 1924. The municipal at-at-lectric plant which was required as a stand-by for electric power was utilized to provide heat which was piped through a certain area of the downtown part of the city. Electric boilers were installed and power developed on the Winnipeg River was used for the production of heat. This method of heating is now being extended to many blocks of business buildings and residences. This principle of heating is not a new thing in Winnipeg, for it was first established in 1924. Mistakes

Glancing through a magazine recently the writer's attention was attracted by an article bearing the same title as appears at the heading of this column, "Mistakes." It was a short article, but two paragraphs in it stood out as important and worth-while—worth passing on for the consideration of those who read this column from week to week.

After rectifying mistakes made by "Great Men of Business," and the different ways in which they react to them, the article in question offered comment:

"Looking back over history, it would seem that mistakes, of themselves, are comparatively unimportant. All men make them. The important thing is how a man acts afterwards."

There is sound philosophy in that observation. It is deserving of more than passing attention.

All people make mistakes. Not one of us is infallible. The real test is: Do we profit by them? Do we use them as stepping stones to real achievements; to the winning of success? Or are we embittered by them; discouraged; inclined to give up and let go?

When a business man makes a mistake, jeopardizes, even loses, the savings and accumulations of a life time, and then begins to think of throwing up the sponge, contemplating poverty or some other rash act, it is a confession that he was not really a man after all; that he is lacking in stamina, will-power and true courage.

Experience is a bitter teacher, but—it is a teacher and a good one at that, because it is through experience that we do learn.

All men make mistakes, big men as well as little men. Nor is it individuals alone who make them. Governments make them, communities make them, nations make them. They must pay for their mistakes, but they can also profit from them.

One of the mistakes of this present age is to confuse business with greatness, to confuse quantity with quality. Next year, the world of Canada will be taken, and already communities are anxiously awaiting the figures to ascertain to how large an extent they have grown in population, each town and city hoping they have made it, but how many of them have been giving serious consideration during the past ten years to the quality, rather than the quantity of their citizenship? The United States census has just been completed, and we find some of their larger cities, while boasting of their growth in size, seriously lacking in the quality, not smaller by some thousands of criminals and others of an undesirable class. In their ambition to become big and bigger they have made the mistake of ignoring the quality of their citizenship, and neglected those social provisions which would make their communities big in the truest, highest sense.

It is not the manufacturer who, through mass production, is turning out an enormous volume of products who is the truly successful man and a benefit to his country; the really successful man is he who is producing quality products. Nor is it the farmer who is operating several sections of land in a more or less indifferent way, who is the truly successful man; it is the farmer who is farming intelligently, striving to raise the best quality of grain, the best grade of stock, poultry and dairy products, with trees and flower and vegetable gardens, who is establishing a real home, making a lasting contribution to his country, and a success in his life work.

But to return to our theme, "Mistakes." All men make them. Do not be discouraged by yours. Remember, the important thing is how a man acts afterwards.

This is a comforting thought. You can retrieve your mistakes. If you had always been right during the past five or ten years you might be no better off financially today than you are. But you have those experiences to guide you now, and you can profit from them if you will.

But, and here let us quote the second outstanding paragraph in the magazine article to which reference has been made. It reads:

"Don't make the most serious mistake of all, that is to think about your mistakes."

Forget them, except to profit by them. Don't brood over them; don't let them discourage or embitter you; don't weaken; don't regard them as irretrievable disasters. Be up and going; forget them; use them to rise to greater heights and a larger success.

Would Report Communists

U.S. Congress Is Urged To Take Necessary Steps

Representative Hamilton Fish, Jr., in a radio address from New York, urged that congress take appropriate steps to deport all alien agitators and Communists affiliated with the Third International.

"We have tolerated them and their criminal activities too long," he said. "Let them go forth, be deported back to their native land."

Congressman Fish, who is chairman of the special committee investigating Communist propaganda in the United States, asserted that what the Communist leaders do in Russia is solely the business of the Russian welfare.

"What the emissaries of the Soviets do in the United States is the business of America, however, is our business," he added.

Book Agent—Sir, this encyclopedia will tell you anything you want to know.

Citizen—Is that so? You turn to the page where it tells who killed Cock Robin and read it off to me.

An Old Remedy

that never loses favor. Minard's Liniment has been in use for fifty years. A sure test of quality.

Time Element in Cancer

Different Periods of Life Have Bearing On The Trouble

A curious time element in cancer is described by Sir George Lenthall Cheate, British cancer authority. He is chief surgeon of King's College Hospital, in London, England, and is attending the British Medical Association meeting in Winnipeg.

There is one time when previously harmless stages of growth are likely to become cancer rather suddenly. This is in the same relative period of life for both men and animals.

"It suggests," Sir George said, "that either some fresh, as yet unknown factor or agent may enter the body just at the critical time and cause cancer, or that the different parts of the whole cycle for a continuous process, and one part passes naturally from one stage to the final catastrophe of cancer."

The first stage is most prevalent from the late twenties to the thirties, the second stage takes form in the late thirties and early forties. The change into cancer occurs in the late forties and early fifties of life.

Guard Baby's Health in the Summer

The summer months are the most dangerous to children. The complaints of that season, which are cholera, dysentery, colic, diarrhoea and diphtheria, come on so quickly that the mother is often unable to prevent these troubles, or if they do come on suddenly to banish them. No other medicine is so effective as Baby's Own Tablets. They regulate the stomach and bowels and are absorbed by the blood by the mother's milk. Sold by mail at 25 cents a box from Dr. Williams' Medicine Co., Brockville, Ont.

Repair Brock's Monument

New Arm and Hand Piece Placed in Position

Brock's monument is again entire, and the great arm and hand piece put over the lake toward the north shore. Recently Hon. George S. H. Meakin, Minister of Highways and government members of the Niagara Park Commission, made an inspection of the finished job, and the scaffolding was removed.

Carved out of a single stone weighing three tons, the massive arm and hand piece was placed in position. The old arm was taken to Hamilton and wired together to serve as a model for the new one. The old arm was broken in a storm two years ago.

It Will Prevent Ulcerated Throat. At the first symptoms of sore throat, which progress ulceration and inflammation, take a spoonful of Dr. Williams' Pink Pills. Add a glass of water to it and it will make it palatable. It will also irritate and prevent the ulceration and swelling that are so painful. Those who were periodically subject to quinsy will make themselves immune to attack.

Large Organ in Paris

Having 4500 pipes, one of France's largest pipe organs was recently dedicated in the huge Salle de la Musique in Paris. The instrument has 71 stops. Its concealed machinery is controlled by 700 wires contained in one cable connecting the organ with a chamber under the stage.

Have Minard's Liniment on your shelf.

Put To Strange Use "It's a funny use to make of it," commented Dr. C. H. Best, co-discoverer of insulin with Dr. G. Banting, on the report that the London Society for the Study of Insulin is using insulin for the treatment of delirium tremens. Dr. Best explained that an overdose of insulin is equivalent to an overdose of alcohol.

Saskatoon's Growth Approximately 10,000 names will be added to the voters' list in Saskatoon riding, figures compiled by enumerators reveal. The total will likely be in the neighborhood of 29,000. The urban polls are expected to mount from 13,335 in 1926, to about 22,000 this year, indicating the substantial growth in Saskatoon's population.

Saskatchewan Wheat Pool According to the latest report the Saskatchewan Wheat Pool has a membership of 82,200 farmers. During the year ended May 31st, the provincial organization handled through its own elevators 87.2 per cent. of all pool grain—this being said to be the high water mark of co-operative grain handling.

Interest in mail and travel aviation in Argentina is growing rapidly. Minard's Liniment removes Warts, relieves Bunions.

Operated Under Difficulties

Doctor Performs Serious Operation On Board Ship With Crude Instruments

A cook's carving knife, a pair of pliers borrowed from the carpenter, a bottle of Holland gin and a needle and linen thread, saved the life of a seaman stricken with appendicitis, and as a result Dr. David R. Robbins, Los Angeles surgeon, recently was presented with a trophy for his long-acting up on the Planet Steamship Company.

A little more than a year ago Dr. Robbins and his wife left Los Angeles on the steamship "Noorderdyk" for Germany, where the doctor was going to study for a year. He left all his surgical instruments at home, intending to buy new ones in Germany.

Three days out of Panama, the "Noorderdyk" received an R.O.S. from the steamship "Corvus" saying that Henry Lohs, 21-year-old sailor, was stricken with appendicitis.

The "Noorderdyk" attended to the "Corvus" and when they met, Lohs was transferred to the "Noorderdyk." Dr. Robbins was asked to save the man's life.

Robbins borrowed a carving knife from the cook, made the incision and with the pliers removed the inflamed appendix. He then sewed up the incision with a needle and thread borrowed from his wife and disinfected the wound with Holland gin. A piece of rubber tubing, which he had used for drainage. As a result of the operation, Lohs is hale and hearty, and is ready to go home. He sings, "Blow the Man Down."

Because he used such strange instruments, Dr. Robbins refused to accept any pay. He is now returning to Los Angeles, where he is studying in Germany he was presented with the silver loving cup.

However, the steamship company did not forget Dr. Robbins' debt on the high seas, and when he returned to Los Angeles from his year of study in Germany he was presented with the silver loving cup.

Start Long Trail Ride

Party Of Britishers Undertake Long Journey Through Rocky

Starting on a trail ride that has never before been attempted, Sir Reginald Baker, Bart., of London, England, and a party of Britishers, including Sir John G. B. Baker, Bart., of London, England, and J. Wilson Perry, of Surrey, England, left the Banff Hotel recently for a trans-mountain ride to Port Hope, B.C., with the possibility of continuing across the Rockies to Vancouver by the same mode of travel.

The route they are following takes them past Spray Lakes, by the Spray River to Fairview, and then down Palliser River to the Kootenay. This section of the ride is the route discovered by Capt. J. H. Ross. They will cross the Kootenay, then Tiger Pass to the Columbia River.

After crossing the Columbia at Wilmer, they will follow Ross Creek to Toby Pass, then crossing the Selkirk system and will descend the Duncan River from Nakusp to Enderbury, where they will travel by boat, then cross the Fire Valley Pass to reach the Okanagan, Prince Rupert and Hope.

Some sections of the trails they will travel have not been packed before for twenty years, so some trouble may be experienced in getting through. The whole party consisted of the three principals mentioned, Sir Reginald's chauffeur, a guide and two men. Eleven pack horses constitute the train.

Perian Balm—Invaluable to the whole family. To the mother, a flawless aid to loveliness. To the child, a soothing, healing balm. And to the soldier, a splendid hair restorative and cooling shaving cream. It soothes and refreshes the skin. Makes dandruff disappear and white, indispensable to dainty women. A little gentle rubbing and it is a relief by the times, making the skin truly rose-leaf in texture.

Saskatoon's Growth Approximately 10,000 names will be added to the voters' list in Saskatoon riding, figures compiled by enumerators reveal. The total will likely be in the neighborhood of 29,000. The urban polls are expected to mount from 13,335 in 1926, to about 22,000 this year, indicating the substantial growth in Saskatoon's population.

Saskatchewan Wheat Pool According to the latest report the Saskatchewan Wheat Pool has a membership of 82,200 farmers. During the year ended May 31st, the provincial organization handled through its own elevators 87.2 per cent. of all pool grain—this being said to be the high water mark of co-operative grain handling.

Interest in mail and travel aviation in Argentina is growing rapidly. Minard's Liniment removes Warts, relieves Bunions.

Don't Let Constipation Lead You Into Serious Illness

Serious rectal troubles, piles, paralysis, hemorrhoids, are frequently the result of using cheap cathartics.

ENO is pleasant, gentle, safe and sure.

A daily dash of ENO in a glass of water every morning, tones up and sweetens the entire system.

The correspondent says the women adopted a resolution calling for abolition of the veil; for permitting of divorce and intermarriage to men other than their husbands; for making divorce possible to women equally with men; for making 18 years the legal minimum age for marriage, and for compulsory education of children of both sexes.

Importance Of Rubber Industry

Canadian Rubber Products Exported To Many Countries

Now-a-days the world moves on rubber, and this does not apply to automobiles alone. According to a recent report of the Canadian Government the people of Nigeria, in June, bought 300 pairs of shoes with rubber soles from Canada. Barbados took 3,020 pairs and Trinidad, 6,505 pairs.

Although Canada is not a producer of raw rubber, the rubber industry is of much importance and rubber products are exported to many countries of the world. In June the export of Canadian automobile tires exceeded \$1,000,000. The largest buyers were New Zealand, British South Africa, Belgium, Argentina and Brazil.

Douglas' Egyptian Liniment is remarkable in its quick, effective action. Relieves instantly burns, sprains, toothache and neuralgia. Is valuable for sore throat, cramp and quinsy.

Poultry Losses

Twenty-Six Million Dollars Lost Annually Through Disease

Twenty-six million dollars is the price paid by farmers and poultry raisers for loss through diseases in poultry flocks annually according to recent estimates. Most of this loss is caused by the internal parasite and according to F. C. Elford, Dominion Poultry Husbandman, much of it is preventable. A good deal of it, he points out, can be eliminated by keeping young chicks away from adult birds and on absolutely clean soil.

Big Cut In Naval Costs

Mr. Hon. A. W. Alexander, First Lord of the Admiralty, announced in the House of Commons that the Labor Government reduced the cost of the British naval building program for 1928-29 by an estimated £12,000,000. Mr. Alexander made the announcement in reply to a question about how much naval costs had been reduced since the present government took office.

Reduced By Asthma. The constant strain of asthma brings the patient to a dreadful state of hopeless exhaustion. Early use should be made of the famous Dr. J. D. Kellogg's Asthma Remedy, which means help and comfort. No matter how asthma is present in the least degree should be without this great remedy.

A species of acacia which occurs in the Sudan, has extremely long shoot-stems, which produce sounds like the sweet-scented flutes.

If a woman isn't married she wants to be, and if she is, the chances are she doesn't want to be.

Moslem Women Progressive

Congress Held At Damascus Asks For Reforms In Restrictions

The London Daily Herald says that women delegates from nearly every Moslem country have just concluded a congress at Damascus which represents the first concerted move by women of the Islamic faith to escape its restrictions.

The correspondent says the women adopted a resolution calling for abolition of the veil; for permitting of divorce and intermarriage to men other than their husbands; for making divorce possible to women equally with men; for making 18 years the legal minimum age for marriage, and for compulsory education of children of both sexes.

Statues To Women

There are statues to twelve women in London, England; of these, six are queens, the other half-dons being Mrs. Siddons, the actress, Florence Nightingale, Grace Darling, Nurse Cavell, Margaret MacDonald, the Prime Minister's wife, and Mrs. Pankhurst.

Summer COLDS

Almost everybody knows how Aspirin tablets bring colds and flu but why not prevent it? Take a tablet or two when you first feel the cold coming on. Spare yourself the discomfort of a summer cold. Read the proven directions in every package for headaches, pain, etc.

WORLD HAPPENINGS BRIEFLY TOLD

In a recent month 12 tons of freight were carried by air from the Netherlands to London, England. Victoria, largest dry spot on the beer map of British Columbia, may vote again shortly on the question of beer parlors.

With labor unrest spreading throughout northern Canada, general strikes of textile workers in Roubaix and Halluin was called, affecting nearly 100,000.

The gross earnings of the Canadian National railways for the ten-day period ending July 31, were \$6,219,504 as compared with \$6,224,904 for the corresponding period of 1929, a decrease of \$1,705,400.

Because he finds England more inspirational to poetry, Conrad Aiken well known United States poet, has sailed for England, possibly to remain the rest of his life. He won the 1929 Pulitzer award for the best American verse of the year.

Mr. Macquisten has appeared in the British House of Commons in suit of shantung silk, courteously giving a lead to drabby dressed politicians, says a writer in The Guardian. In 18th century, Parliament the attire of members must have made the House a feast of color.

Plans for production of an all European news reel include talks made in the Arctic regions. A German-Swedish company will use dogsleds and a specially fitted steamship in carrying the first sound-film cameras ever to penetrate the Arctic Circle.

In the presence of thousands of citizens and visitors, Sudbury recently celebrated its entry into cityhood. Decorated floats paraded for an hour through the streets. Hon. Charles McCrear, Minister of Mines for Ontario, presented the charter bearing the seal of incorporation.

The German aviators, Hirth and Weller, who reached Iceland on an attempted flight from Germany to the United States, have abandoned their project and Hirth sailed for Montreal with their small monoplane. His companion will take the next ship back to Germany.

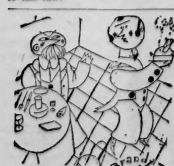

Nationalize Coal Mines

Drastic Steps in British Coal Mining Industry Are Planned

Rt. Hon. William Graham, President of the Board of Trade, in a speech at Durham, England, said the recently passed coal bill was a Parliamentary step along the road which the British Government intended to follow until the great collieries were the property of the people. His audience, composed largely of farmers, welcomed the sentiments expressed. "We are pledged as a Government to nationalize the mining royalties, and we hope the time will be found in the next session for that bill," Mr. Graham said.

Must Wear Home Products

A new law has been passed in Persia, similar to certain laws passed in England a few centuries ago, compelling every government official from the highest to the lowest, to wear clothes made of Persian manufacture only. Several attempts are to be meted out for every infringement of this law.

Interesting Exhibits

Floating Museum Of Byrd's Antarctic Expedition

The City of New York, flagship of Rear-Admiral Byrd's Antarctic expedition, is to go on tour as a floating museum of the Antarctic. The Administration will be charged to the public in an effort to overcome the expedition's deficit of more than \$100,000, which continues to mount because of the expense involved in assembling the scientific material brought back by the expedition.

Announcement of the move came from Captain Ashley C. McKinley, in charge of the expedition's affairs in the absence of Admiral Byrd. The ship will go on exhibition at the Ninety-sixth Street pier in the North River, and will be open to the public from 10 a.m. to 10 p.m. On leaving New York it will go to Boston and other New England cities and will then proceed south along the Atlantic seaboard.

"Now that a month has been spent in assembling the models and exhibits built by the expedition members during the Antarctic night," Captain McKinley said, "When open to the public the ship will contain the most complete exhibition of Antarctic specimens ever gathered, as well as hundreds of other souvenirs of the expedition."

On view will be a model of Little America, constructed to scale by the American Museum of Natural History; models of the Ployd Bennett, the airplane used in flying over the South Pole; models of other expedition planes; a model of the City of New York and a replica of a camp scene showing one of the exploration parties.

Winnipeg Newspaper Union

(By Annette Worthington).

A printed crepe silk suit shown smart it can be in straight silhouette with low-bust fullness. The pointed outline of the hip yoke and the circular skirt flounce, produce a particularly slenderizing effect.

The neckline is interesting in cool open V-shape. The rolled collar and jabot of plain crepe match the background of the dress.

The short sleeves with elbow flare are very smart. Style No. 2574 can be had in sizes 14, 16, 18, years, 36, 38, 40 and 42.

It's very pretty in printed crepe silk with wide band of contrasting color. The flounce, sat crepe silk, pastel sheer linen and printed blouse are fashionable fabrics for its development.

Pattern price 25 cents. Be sure to fill in size of pattern. Address Pattern Department.

Aviators Have Trying Trip

Combat Engine Trouble While Flying North of Port Churchill

After combating engine trouble away north of Churchill, making emergency repairs and carrying out their mission to the Arctic, the Aviators are back at their base at Cormorant Lake, Mile 42, Hudson Bay Railway. The officers are E. Hickson, flying a Fairchild, and M. B. Barclay, flying a Bellanca. They conveyed A. E. Forsyth, Federal Government official, to the far north to collect data on reindeer pasture.

According to reports from Churchill, the officers were flying about 100 miles north of Eskimo Point on Hudson Bay and about 80 miles south of Chesterfield Inlet when a cylinder locked on the Fairchild. They dropped down in the sea.

The ship "York," flying northern waters was nearby. The captain of the vessel assisted but the pilots found they could make repairs. They managed to get out of the water and landed on the ice, finally coming down at Vavane, a small trading post, and base of operations of Dominion Eskimo. The ship was then destroyed by the Eskimo. Their destination was in the "barrens" about 150 miles north of Churchill. They met Alex Nicholson in charge of Dominion Explorers' base. He helped them with spare parts and they flew out to the barrens.

Long Telephone Call

Radiophone Conversation Between South America and Australia

Advice received at New York from Buenos Aires describe a radiophone conversation between Capt. Louis Yancey in an aeroplane and Sydney, Australia.

The connection, which was made from the plane, 5,000 feet above the Buenos Aires airport, established a distance record for telephoning from an aeroplane in flight. It spanned 14,000 miles.

The call was relayed from the radio station at Sydney, Australia, to Madrid, Spain, thence over land lines to the French side of the English Channel, where submarine cables carried it to England. At Rugby the beam wireless picked it up for wireless transmission to Sydney.

Accepts Vice-Presidency

Lady Willington Takes Interest In Canadian Branch Of Dr. Barnardo's Homes

Her excellency, Lady Willington, accepted the honorary vice-presidency of the Canadian branch of Dr. Barnardo's Homes, it was announced by the Canadian headquarters of the organization.

Lady Willington is a daughter of the late Lord Brassey, the latter being president of the Barnardo's Homes organization in England at the time of her birth, and a great personal friend of the late Dr. Thomas John Barnardo. Her father took a keen interest in the migration of boys and girls to Canada.

Recipes For This Week

(By Betty Barclay)

SNOW-TOPPED SALAD

On a bed of crisp lettuce leaves arrange a mound of fruits of various kinds, cut in small pieces. Oranges, pineapples, apples, grapes and peaches are excellent. Berries in season, or small cubes of watermelon or cantaloupe, may also be utilized. Top this with a liberal serving of stiffly beaten, sweetened whipped cream. Immediately before serving, sprinkle the fruits and lettuce base liberally with a syrup made by dissolving four teaspoons of sugar in the juice of two oranges and one lemon.

SWEDISH SPICE COOKIE

1 cupful sugar.
1 cupful butter.
2 eggs.
4 cups flour.
1/2 teaspoonful baking powder.
4 cup sweet baking powder.
Mix all ingredients together in bowl, stirring lightly with powder with flour. Mix with the hands until ingredients are evenly being crumbed, not to work too long. Push through pastry gun. Shape in rings or S shapes. Bake in a quick oven.

Dog's Name In Directory
Pussy Willow Thornton, an aristocratic building, has a telephone listed in her own name. It was revealed in Chicago. A few lines above Pussy Willow's name will be found the name of Mrs. P. Thornton, the dog's mistress. Mrs. Thornton's theory is that animals are as human as people and therefore have a right to be listed in the telephone directory.

It's strange that a motorist never remembers he used to be a pedestrian.

Claims Matter Is Weightless

Scientist Gives New Definition Of Weight and Force Of Energy

After delving into philosophical questions as a hobby from a very early age, W. Donald Mitchell, using the non-de jure of "Logos Philo-sophy," has published "The Great Light of Relativity."

In his work, Mr. Mitchell, who was born in Penrose, Ontario, a Scotch peasant, claims to reveal that "the earth does not weigh so much as it is claimed that matter is weightless," and gives a new definition of weight, and also of the force of energy. He claims to reverse Newton's equation of attraction, and thus Einstein's space-time-energy theory. He gives other concepts of philosophy in systematic form, chief of which seems to be his statement that, "knowledge, or intelligence, is the relative, transference, personal and material, derived from objects and elements of external reality, partially retained in memory—in or on the negative plates of cells of the brain."

The author of this remarkable work believes himself to have made the most extraordinary discovery in recent generations, and thereby set a new standard for philosophy, metaphysics, psychology, and thus education. "It promises to affect the entire scientific thought of the age," he says. "It makes no declaration dogmatically, but states 'I shall be delighted to receive, either personally or otherwise, any criticism for or against statement, action or definition, appearing herein, for the spirit of progress is founded in criticism and unbiased investigation.'"

The Peking Man

Canadian Scientist Has New Theory Regarding Discovery In China

The "Peking Man" was really an adolescent girl, who lived possibly 1,000,000 years ago, Dr. Davidson Black, Canadian scientist, said, in announcing the discovery of a second ancient skull.

The noted paleontologist, who dug up the skull of the "Peking Man" some months ago, said he had found the second remarkable specimen in the rock of the same cave in which he found the first skull.

The second is that of an adolescent male, Dr. Black said, and the measurements further indicated the first skull was that of a girl.

Grape Juice Duty

Special Tariff Item Designed To Meet Foreign Competition

A special issue of the Canada Gazette announces that an order-in-council has been passed bringing into effect the special tariff item designed to meet foreign competition in domestic grape juice. Grape juice previously was all under one duty. The new duty provides a tariff of 25 cents a gallon, with an addition of three cents a gallon for each 0.1 increase in specific gravity above 1.074. It comes into immediate effect.

Place any man who has no installment payments, no taxes, no stock and still he'll save the bars to get paid.

SUNDAY SCHOOL LESSON

AUGUST 17

SAUL, "A MAN OF GREAT POSSIBILITIES WHO FAILED"

Golden Text: "Wherefore let him that thinketh he standeth take heed lest he fall."—1 Corinthians 10:12. Lesson: 1 Samuel, Chapters 8 to 13. 13: 13, 14, 15, 22, 14: 27, 28, 31. Devotional Reading: Psalm 1.

Explanations and Comments

God's Will Regarding Saul Revealed to Samuel, 1 Samuel 9:15-17.—In the Hebrew the verb "revealed" as the margin of the Bible explains, means literally "uncovered the ear" and signified the divine Spirit's announcement to the human spirit. The revelation which Samuel received the day before Saul's arrival, that a man of the tribe of Benjamin would come to him, whom he was to appoint king over Israel, was psychologically based on his constant prayerful, expectant reflection as to how God would establish the monarchy. When Samuel saw Saul he asked himself, "Is this man the Benjamin of whom he had been told, and felt sure that Saul was the man chosen of God to be the leader of his people."

God's voice is of the heart—1 do not see eyes therefore of the heart are God's. And to discern the Voice amidst the

In that hard task that we are born

The Meeting Of Saul and Samuel, 9:18-26.—In search of his father's sheep, Saul sought out Samuel. He found him on his way to the sacrifice. Samuel said at once that he was in his mind at the time of the lost animals, telling him that they were found, and then awakened expectations in Saul's heart by adding: "For whom is all that is desirable in Israel? Is it not for thee and for thy father's house?"

An answer to Saul. Answered: "Am I not a Benjamin, of the smallest of the tribes of Israel, and my family the least of all the families of Israel? Wherefore then hast thou said to me as thou hast said?" This extravagant expression of Samuel was in accordance with Eastern custom, but, as Alexander Whyte thinks, it seems to be the language of a man whose heart is really touched for the time being by divine grace. It is really humbling.

The Anointing Of Saul, 9:27 to 10:1.—After they were leaving the city's precincts, Samuel bade Saul send his servants ahead, and he himself poured oil upon Saul's head and kissed him. Before this, priests had been anointed by their office, and when Saul was consecrated as king by the anointing of the monarchy was regarded as a divine institution. "The anointing of a king was a sacred thing," said the prophet Isaiah.

It is not that Jehovah hath appointed thee to be prince over his inheritance?—questioned Samuel. Thus he impressed Saul with the fact that it was God who had chosen him to rule Israel to God, therefore, he was responsible for the way he ruled.

Survey Of Wood Waste

The Vancouver Forest Products Laboratory, conducted by the Forest service of the Department of the Interior, is engaged on a survey of wood waste in British Columbia sawmills with a view to assisting the industry in devising methods of profitable utilization of wood now wasted.

We think we're a smart people but it took half a century for salesmen to learn not to ask the woman customer what size shoe.

No Loss From Pool Guarantees

Wheat Pool Did Not Have To Call On Government For Funds

A special despatch to the Toronto Mail and Empire from Ottawa says: "From no less a person than the chief statistician of the Canadian Wheat Pool's selling headquarters in Winnipeg, government authorities in Ottawa have received the cheering news that the pool's sales and purchases have incurred no loss from their guarantees of the Wheat Pool's operations."

"Early in the year, when it became apparent that Canada was not going to be able to market her whole crop and that the market price had suffered a severe slump, the three prairie governments put their credit behind the Wheat Pool to the extent of guaranteeing the banks against loss through the advances made by the pool."

"According to information supplied to the Dominion government, there has been no loss. The pool's crop year ended July 15. Everything transacted from July 16 onward is part of the 1930 pool. Compilation of the final returns of the 1929 pool is under way, and has progressed far enough to reveal that the pool sold enough wheat above the dollar price to at least compensate for the quantity which had to be sold below that mark—leaving the provincial guarantees unincurred."

"Andrew Cairns, statistician for the pool, was in Ottawa several days ago securing passports and making preparation for a trip to Russia. He has now departed for that country for the purpose of surveying at first hand the state of wheat growing in the land of the Soviets and determining to what extent Russia is looming as a serious factor in European export wheat supply. Mr. Cairns informed the government of the situation in regard to the guarantees, which, he said, would now expire."

Mediterranean Service

Inauguration Of A New Monthly Service From Canada

Inaugurating the new monthly service from eastern Canadian ports to Gibraltar, Malta, and other Mediterranean ports, the "David Livingstone" will sail from Montreal on or about September 10. This will be followed about October 10 by the S.S. Benguise.

The new service, according to the Department of Trade and Commerce, will consist of special motorships, equipped for cargo and accommodation for 10 or 12 passengers. Owing to the absence of a direct steamship service between these ports, and Montreal or Halifax, Canada has not been able to share in these markets to any extent in the past.

New York now has four airplanes for its police patrol, which will watch out for law-breaking from the vantage point of the air.

The pimento tree, a Jamaica native, is the source of allspice.

Make Your Money Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

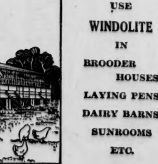

This unbreakable glass substitute allows the full sunlight to enter, in light and flexible, easy to cut and fit, withstanding extreme changes in temperature, keeps out cold and wet, but

allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive and grow to full development under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

ALBERTA

Found—Shoe for right foot, with pance sole. Owner apply at Chronicle office.

Mrs. G. L. Depue and family, accompanied by Jean Gardner are at Waterton Lakes.

Members of A. Kramer's family have been seriously ill this week but are reported to be improving.

Lost, north or northwest of town, Firestone 29410 tire on a 1929 Buick. Finder please leave at Chronicle office.

Guy Voisey, who has been seriously ill for the past week, is reported to be improving satisfactorily.

Infantile paralysis has made its appearance at several points in the province and new cases are being reported daily.

Jack Taylor won 1st and 3rd for cock and two hens in the Buff Orpington class, and 2nd for cockerel and two pullets. He also captured the championship for the best pen in the show, for which there were sixty entries at Carmangy.

Information is urgently requested regarding the whereabouts of John Gray, Scotch nationality, age 43, walks with a limp caused by a broken leg, last heard of in Champion district. Kindly communicate information to Alberta Provincial Police, Vulcan.

A car load of young people from Snake Valley, en route home from the dance on Saturday night, had the misfortune to turn their car over in the soft dirt at the corner near C. McLean's. One of the ladies had a damaged knee as a result but the other occupants escaped injury.

C. D. Brooks returned from a trip to Peace River the first of the week, having taken up a homestead a short distance from Wembley. He thinks the north country is the real thing, and is enthusiastic in regard to prospects there. He saw Rev. Hunt and family settled at Beaver Lodge before he left.

While operating a binder on Saturday Ray Warren had the misfortune to have the knotted needle run through the middle of his left hand and as a consequence will be unable to use that member for some time.

Mr. and Mrs. Frank Anderson and family, en route from Spokane to Calgary, were visitors here on Tuesday. Frank is enthusiastic with regard to crop prospects here which he asserts equal the best seen on his trip, and excel the average in every respect.

K. R. McLean, R.O., of McLean & Anderson, Sight Specialist, 208-8th Ave West, Calgary will make his monthly visit to Champion Friday, Sept. 20th, at the Drug Store.

J. D. Leong, who for some five years was chef at the Long Louie Cafe, has just returned from a trip to China and has taken his old position in the restaurant. There'll be good eats at Louie's now.

Mr. and Mrs. Frank Anderson and family, en route from Spokane to Calgary, were visitors here on Tuesday. Frank is enthusiastic with regard to crop prospects here which he asserts equal the best seen on his trip, and excel the average in every respect.

Mr. and Mrs. M. Sisson spent the week end at Carmangy visiting Mr. and Mrs. F. Teskey.

There has been a virtual plague of moths for the past three nights and they look exactly like the cutworm kind. If they are the entomologists have scored in their prediction of great danger to farming interests from this source. There are enough moths on the wing to cover every field in the country with eggs and insure a supply of cutworms for years to come.

At the August meeting of Champion W.I., which met and had a charming time at the home of Mrs. Dow, it was decided to hold the flower show on August 29th, at the same time as the constituency conference. Fifteen dollars were donated were donated to the tennis club. Votes of thanks were tendered Mrs. O. Harper, Mrs. Summers, Mrs. Dow, Mrs. Mifflin and Mrs. Bastin for their wonderful work at the Carmangy fair exhibit.

If anyone wishes more information on the subject of Health Units, apply to Mrs. Mifflin.

As Mrs. Cain, who was to give a book review, was absent, and Mrs. Beaulieu, who addresses us on "Legislation," was ill, the programme consisted mostly of arrangements for flower show and conference. Adjournment was made earlier than usual and the extra time spent enjoying the excellent salads, sandwiches, tea and cakes served by Mrs. Watkins assisted by Mrs. Cowell and Mrs. Dow. Misses Barbara Dow and Lona Stephenson helped serve.

The September meeting is to be at the home of Mrs. Fred Smith.

Champion Consolidated School District, No. 40
Meeting of Ratepayers
A meeting of the ratepayers of the Champion section of the above school district will be held in the Public School on Saturday August 10, 1930 at 2:30 p.m. for the purpose of electing a trustee to complete the unexpired term of A. McCullough, who has resigned.

Hotel Savoy
DINING ROOM
Having closed the Farmers' Restaurant and taken over the above diningroom, the undersigned trusts that all her old customers will continue in the new location, and that the extra service made possible by increased conveniences will attract many new patrons.

No effort will be spared to please the public with quality meals and up to the minute service.

Mrs. O. E. Hargraves
